ENERGY EFFICIENCY SOLUTIONS FOR YOUR FACILITY

TEG offers a variety of energy efficiency services and tools to identify energy saving opportunities in your facility. Each assessment is approved by one of our experienced Certified Energy Managers.

COMMERCIAL & INDUSTRIAL AUDITS

These evaluations help to identify feasible energy management projects; including HVAC, PC Power & Management, Envelope, Lighting, Controls & Operation and Renewable Energy Sources.

AGRICULTURAL ENERGY ASSESSMENTS

These assessments evaluate energy savings opportunities for agricultural machinery and processes to minimize operational costs.

ENERGY SALES TAX EXEMPTION AUDIT

Manufacturing, food service, and agricultural processes may be eligible to receive tax reimbursements for energy used in production; our audit provides the required inputs.

INFRARED TECHNOLOGY

Infrared images can be used to identify weaknesses in facilities or equipment as well as potentially reduce commercial liability premiums.

BUILDING MODELING

eQuest Building Simulation software is used by our team of experienced analysts to assess complex building systems to determine potential energy savings for renovations or new systems.

STEAM EVALUATIONS

Complete facility evaluations are offered to identify energy savings as well as safety and reliability issues that can lower operating costs.

NEW! ENERGY EFFICIENCY SOLUTIONS FOR INFORMATION TECHNOLOGY

Your IT enterprise has the power to consume less. Verdiem's SURVEYOR software enables organizations to centrally manage and reduce PC energy consumption, often yielding 30-60% in energy savings. Over 600 corporations, government agencies, and universities have implemented SURVEYOR to realize \$20-\$60 per PC annually in savings without adversely impacting PC users or IT.

For more information, visit www.verdiem.com or contact Emily Rice at 515-229-6382.

PROGRAM DEVELOPMENT & MANAGEMENT

As a consulting firm, TEG can provide support and management for energy efficiency programs. Our services and tools can be packaged to meet your specific project needs, and our business development and marketing teams can provide managerial support. Check out the exciting programs we are currently involved in!

LOW-INCOME MULTI-FAMILY

Partnered with Iowa Finance Authority and utility sponsors, TEG administers and delivers this program to Section 8, multi-family facilities or shelters to identify cost-effective energy efficiency improvements. *More information can be found at www.iowamultifamilygreen.com.*

RETRO-COMMISSIONING (RCX)

RCx is a documented process to improve and optimize an existing building's operational performance by identifying and quantifying low-cost operational and maintenance improvements in existing buildings. *Contact Mike Willis at 515-564-1045 for more information!*

STATE ENERGY PROGRAM

- BUILDING ENERGY MANAGEMENT PROGRAM

BeM is a state-sponsored energy program offered by OEI and is intended to provide necessary services and consultation support for every step in the energy management process to schools, cities and counties, hospitals, and universities. *For more information call 1-877-571-6625.*

UTILITY ENERGY EFFICIENCY PROGRAM DESIGN AND DELIVERY

TEG has been involved with utility service providers in designing customized energy efficiency and demand-side management programs for over 20 years. In many cases, TEG delivers and administers these programs to the different customer classes on behalf of its utility partners.

Taxable and Exempt energy usage as defined by the state Department of Revenue.
